Request for Information Response –(RFI)

Project Name **RFP - ABB/Baldor Motors Procurement – McDuffie Coal Terminal**

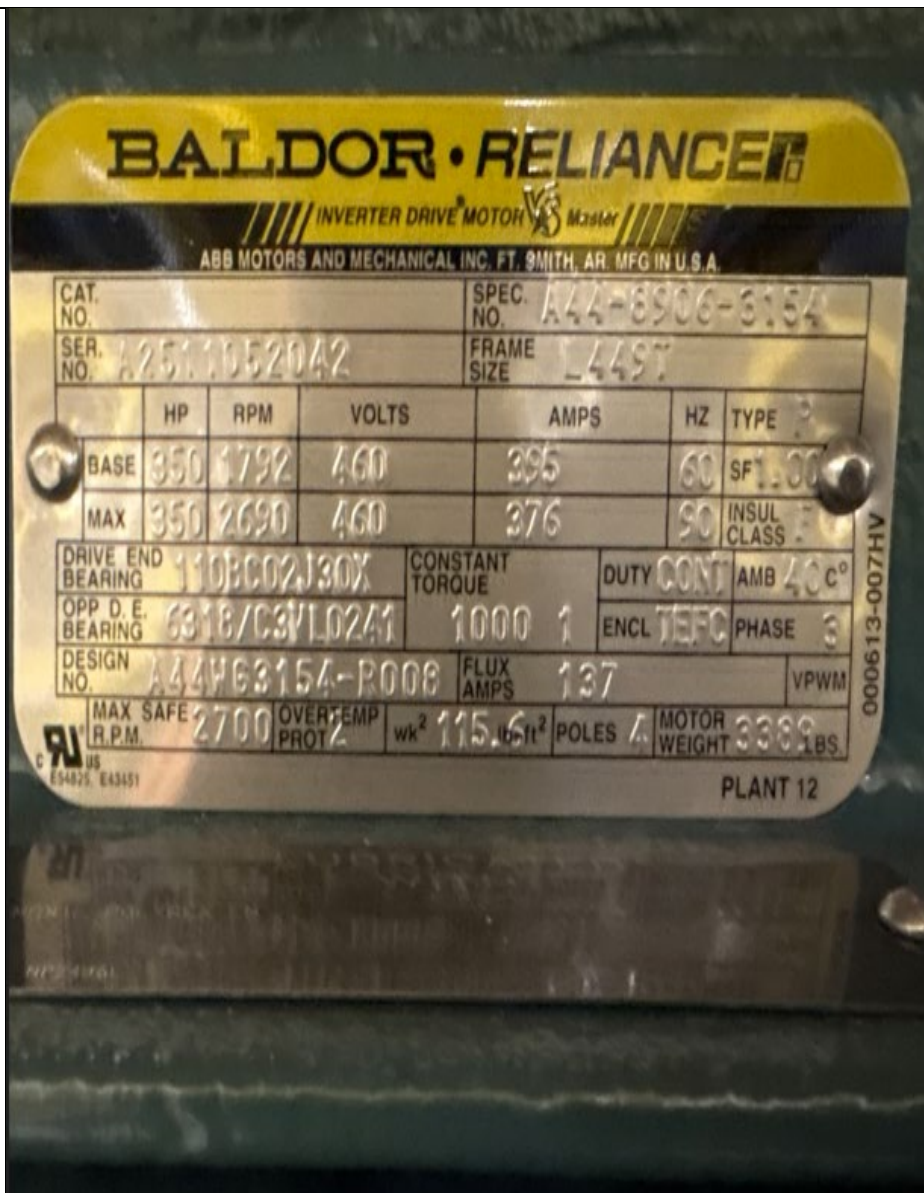

Project No. **Task No. N/A** **RFI: No. 01**

To: Prospective Bidders / Offerors

Date: 8/27/2026

The following RFI's / APA Responses are presented for your information regarding this RFP. The solicitation is not amended in any way or form. All terms and conditions of this RFP remain unchanged.

Item	RFI / APA Response
1.	RFI-1: We have a question of clarification. Your RFP on page 25 states ABB MAC Custom Motor 350 HP 1800 RPM 449T TEFC (We are assuming 460 VAC)?? We understand the F1 / F2 The question is. Is this a standard motor or a Custom motor? If it's a custom ABB Motor, then what specifications are you needing? Example: Standard Ball bearings or Roller Do they run on a VFD? If so, will it need separate cooling and a drive duty rating? Do you want RTDs / Heaters / or Impro seals? If you have a picture of a nameplate that would answer most questions. Please advise APA-1: Yes, see picture of nameplate, captured below.
2.	RFI-2: In looking at the ABB/Baldor Motors RFP, the motors are both shown as custom. Is there a SN or picture of the name plate that we can have? We can't guarantee the exact replacement due to the mods without that information. APA-2: Yes, see picture of nameplate, captured below
3.	RFI-3:- APA-3: Nameplate Provided Below;

4. RFI-4: [RESERVED](#)

5. RFI-5: [RESERVED](#)

6. RFI-6: [RESERVED](#)

7.	RFI-7: RESERVED
